

# Call For Proposals

## Sea Lamprey Research Program

Pre-proposals for the 2013 funding cycle for the Sea Lamprey Research Program of the Great Lakes Fishery Commission are now being solicited. For more details [click here](#).

### Deadline:

**Saturday, January 15, 2012 11:59 PM EST.**

Pre-proposals received after this deadline will not be considered.

Please review the updated schedule at <http://www.glfsc.org/research/SRps.php>.

New projects may not begin before January 1, 2013. Awards will be up to \$200,000 per year. Awards are generally between \$50,000 and \$150,000 per year. Total annual funding available for new Sea Lamprey Research Program projects will be approximately \$300,000.

### Submission Procedures:

Pre-proposals are to be submitted online at:

[http://research.glfsc.org/Pre\\_Proposal/login.cfm](http://research.glfsc.org/Pre_Proposal/login.cfm)

Pre-proposal templates can be downloaded from the website above or the link below:

<http://www.glfsc.org/research/PreproposalFormat.doc>.

Further instructions are available within the website and embedded in the template.

### Proposal Evaluation:

Proposals will be evaluated against the information needs identified by the [Research Themes](#) (see below) under which they are submitted.

### Sea Lamprey Research Program:

The GLFC Sea Lamprey Research Program focuses on the following themes. Meritorious research proposals outside the research themes will also be considered.

[Barriers and Trapping](#)

[Lampricides](#)

[Assessment](#)

[Sterile Males](#)

[Chemosensory Communication Systems](#)

### Areas of special interest:

- What aspects of behavior and ecology of both adult and transformer stage lamprey in streams could be used or exploited to improve trapping?
- What are the sources of parasitic-phase sea lampreys in each lake?
- What are the key lampricide treatment variables that produce residual sea lampreys?
- What are the important parasite-host interactions at the fish community level?
